WORK EXPERIENCE

Globant — Internship

➤ Atlassian Engineer Intern (December 2025 – July 2026)

- Resolved 199 support tickets in the Technical Help queue in line with SLAs, by requirements analysis and decision-making to reach resolutions.
- Administered users, roles, permissions and policies across platforms via User Management.
- Created and maintained technical documentation in Confluence, operational records in Google Sheets, and recorded technical video tutorials in Loom in both Spanish and English.
- Created and managed projects, sites and configurations in Jira and Confluence environments.
- Developed User Stories and collaborated with Atlassian Engineers to support platform improvements and new implementations, and to solve clients requests.
- Support for international clients in English and Spanish.
- Developed a Python reporting tool using Atlassian APIs to extract and process People data from Jira spaces, generating reports for functionality not supported natively by the platform.
- Reworked an already existing Python script from the ground up that automatically reactivated deactivated users in User Management, using Atlassian Directory and Administration APIs, and making use of the Atlassian User Management Lifecycle.

EDUCATION

Universidad Argentina De la Empresa (UADE)

B. Eng. in Computer Engineering - expected to graduate in Dec 2027

Intermediate degree: Computer Science Analyst (GPA: 7.24)

Completed courses: 37 out of 52 (71%)

Coderhouse

- **Relevant coursework:** Python, SQL, ReactJS, Backend Development (I), AI Automation, HTML/CSS.

LANGUAGES

English - Cambridge Level C1 (Certificate in Advanced English)

TECHNICAL SKILLS

Programming Languages: **Python, Java, JavaScript, HTML, CSS**

Databases: **SQL, MongoDB, Google Firebase**

Frameworks: **ReactJS, Spring Boot, React Native, Express.js, Android SDK**

Tools/platforms: **Jira, Confluence, Git/Github, REST APIs**
